

Standing seam roofs

High formability and outstanding robustness with Aluzinc® HFX range

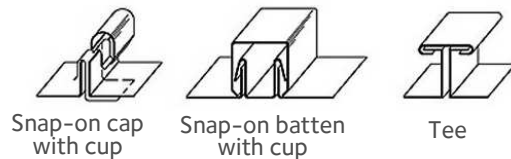

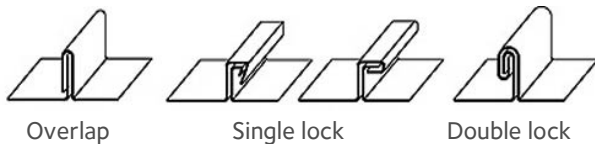

Aluzinc® HFX is a new reference for standing seam roofs technology.

Aluzinc® HFX (High Formability eXtended) for standing seam roofs combines the corrosion resistance reputation of traditional Aluzinc® with an extreme formability.

The result is a new standard in roofing, replacing pure-zinc sheets and offering a cost-effective alternative to other metallic solutions, especially for private houses and public buildings.

Aluzinc® HFX: Aesthetic, formability and durability

Steel quality	DX56D+AZ185 HFX
Thickness	0,4 to 1,5 mm
Width*	700 to 1 500 mm
