

Company: ArcelorMittal Flat Carbon Europe SA
Address: 24-26 Boulevard d'Avranches
L-1160 Luxembourg

Declaration concerning the classification of fire reaction of uncoated and metallic-coated steel products under the Construction Product Regulation

Flat carbon steel production centers:

ArcelorMittal Atlantique et Lorraine SAS, ArcelorMittal Belgium S.A., ArcelorMittal Bremen GmbH, ArcelorMittal Dudelange S.A., ArcelorMittal Eisenhüttenstadt GmbH, ArcelorMittal España S.A., ArcelorMittal Galati SA, ArcelorMittal Méditerranée SAS, ArcelorMittal Ostrava a.s., ArcelorMittal Piombino S.p.a., ArcelorMittal Poland S.A., ArcelorMittal Sestao S.A., ArcelorMittal Skopje, ArcelorMittal Tailored Blanks, ArcelorMittal Technotron s.r.o.

The Commission Delegated Regulation (EU) 2016/364 establishes classes of reaction to fire performance for construction products, in the framework of the Construction Product Regulation pursuant to Regulation (EU) No 305/2011 of the European Parliament and of the Council. The decision 96/603/EC, amended by the decision 2000/605/EC, establishes the list of construction products pertaining to the (Euro)classes "No contribution to fire" A1 and A1_{FL}¹ without prior testing (products equivalent to incombustible products). See appendix in page 2.

Accordingly, uncoated steels and metallic coated steels are classified in the Euroclasses A1 and A1_{FL} without testing.

¹ FL: specific classification of construction products for floors

APPENDIX

List of materials to be considered as reaction to fire Classes A1 or A1_{FL} provided for in Regulation (EU) 2016/364 without the need for testing (extraction)

General notes

Products should be made only from one or more of the following materials if they are to be considered as Classes A1 or A1_{FL} without the need for testing. Products made by gluing one or more of the following materials together will be considered Classes A1 or A1_{FL} without testing provided that the glue does not exceed 0,1 % by weight or volume (whichever is the lower).

Panel products (e.g. of insulating material) with one or more organic layers, or products containing organic material which is not homogeneously distributed (with the exception of glue) are excluded from the list.

Products made by coating one of the following materials with an inorganic layer (e.g. coated metal products) may also be considered as Classes A1 or A1_{FL} without the need for testing.

Material	Comments
Iron, Steel and stainless steel	Not in finely divided form
Copper and copper alloys	
Zinc and zinc alloys	
Aluminium and aluminium alloys	
Lead
