

ArcelorMittal

Magnelis[®] steel

As your investment deserves a long life

With its unique composition and excellent protective performance, Magnelis[®] is the leading galvanised steel for long-lasting solar mounting structures.

For racks, purlins or tubes, Magnelis[®] steel (ZM310) offers an expected lifetime of more than 30 years in C3 environments. This performance has been certified by independent bodies.

For poles and columns, Magnelis[®] steel (ZM620 or ZM430) can be used for foundations in soil or concrete with a guarantee up to 25 years based upon a local soil analysis.

XCarb[®] green steel certificates can be purchased alongside your Magnelis[®] order.
